CONFIDENTIAL

ENCL. NO.

OFFICE OF THE
DIRECTOR OF INDUSTRIES AND COMMERCE, IN MYSORE.

Bangalore. 16th December ....192 2.

FROM

P. G. D'SOUZA, ESQ., B.A., B.L.

Director of Industries and Commerce in Mysore

Bangalore (India)

Itc Mem 16/12

GEN. & REV. SECRETARIAT 18 DEC 1922 INDUSTRIES & COMMERCE. MYSORE.

To

The Secretary to the Government of Mysore,
General Department,
B a n g a l o r e.

SIR,

With reference to Government letter No. IC. 1511/I & C dated the 7th September 1922, regarding the transfer of the Government - Soap Factory to private agency, I have the honor to state that steps were taken to notify the terms offered by Government widely, which were also published in the leading newspapers in Mysore and British India and information was also sent to the various Chambers of Commerce. No tenders have been received either from persons inside or outside the State though there were several enquiries. The main - reasons why the public do not show much interest in this industry are i) the prices of imported soaps have recently been considerably reduced and there are a large number of small factories manufacturing very inferior washing soaps which command a ready sale; ii) there is great stringency in the money market and no one seems to be prepared to undertake the risk of taking the factory and floating it into a Company; and iii) so far as the outside public is concerned, Mysore does not possess any special advantages for starting the industry on a very large scale.

* H

Our present experience is that there is a great demand for our toilet soaps and it is worthwhile developing this side of the Industry. In these circumstances, I strongly recommend that my proposals contained in letter No. CC. 11/59 dated the 3rd July 1922 may be sanctioned immediately.

AS Papers to be sent 16.12.22

In this connection, I beg to invite attention to the remarks of the Chairman of the Chamber of Commerce, Madras, at its last Annual meeting in which it has been pointed out that the import of Sunlight (Washing) soaps has been greatly affected by the competition of small factories established in several parts of India for the manufacture of Washing Soap. The firm of Messrs. Lever Brothers had sent one of their representatives from England recently to investigate the possibilities of starting a Branch Factory in Southern India as an adjunct to the larger factory they are arranging to establish in Bengal chiefly for the manufacture of Washing Soaps. It may be possible to make that firm to send a definite proposal to take over the factory on certain terms in case Government are prepared to consider the transfer of the Factory to such an Agency. At any rate there is little risk in our concentrating ourselves in the manufacture of toilet soaps for which we have a fairly good local market.

I have the honor to be,

Sir,

Your most obedient servant,

DIRECTOR.

Subject:—

Future working of the Soap Factory.

12

Agreeably to His Highness' orders dated 31st August 1922, regarding the transfer of the Government Soap Factory to private agency, steps were taken by the Director of Industries and Commerce to notify widely the terms offered by Government. The Director now reports that there has, so far, been no response and that no tenders have been received either from persons inside, or outside, the State though there were several enquiries. Accordingly, the Director strongly recommends that the proposals contained in his letter, No.CC11/59 dated the 3rd July 1922, may be sanctioned as there is a great demand for the toilet soaps manufactured in the factory.

(2) The subject was considered at the meeting of the Council held on the 11th instant when it was resolved that the Soap Factory might continue under Government for another year.

(3) The question of the development of the Factory on the lines recommended by the Director will be further examined and dealt with in due course.

(4) The recommendation of the Council is submitted for His Highness' gracious approval.

34 There is now no money and I can not agree to the proposal. Whether money can be spared for the Concerns of the I & C. Dept to part of the Capital finance problem which can only be considered as a whole. This demand may be noted for consideration in connexion with the Cap. programme of next year.

35 C.O. of 1.3.23 has been issued without reference to finance Dept. The assumption that R 57000 entered in Budget is available for expenditure is not correct. The Iron Works have exhausted their grant and demands for accot of both fixed & floating Capital are increasing. The additional grant of about 10 lakhs has also crippled the finances for such circs. The grant of R 57000 is not available & S/D not be allotted for expenditure

36 For pensal Traders.

37 The Administrative Deptt can only refer to the Budget provision according to which it perhaps has a claim for the grant. But it has no means of verifying whether the money is actually available or not. The Instruction mentioned in fn 2 1-3-23 was made on the understanding that the grant provided in the budget would be available and this has been seen by the Fl Secretariat.

38 The question of finding out further means for the expansion of the facility is now for consideration. The Fl Dept does not comment further upon the aspect whether the finance Committee is found out of the purview of the concern, unless such purview has already been otherwise appropriated for the said expenditure &c.

40 Sir. I do not think the profits earned by the industrial concerns run by Govt are earmarked for industrial Expansion — at least at present. All receipts are pooled & made available for expenditure in view of the existing financial position.

41 If money cannot be made available to Expansion can be postponed. Personally I feel that any investment made on this Expansion will bring in a satisfactory return & will do appreciably more than others have done.

NOTE—Contn. sheet.

Serial No. 61

On the financial side, the points to be urged are the following:-

1) Will the investment assuredly pay?

2) Is any further investment on this Concern desirable in view of the decision to transfer it to private enterprise sooner or later?

3) Can the money for the proposed expansion be found

62 It is stated that there is no reason for misgiving in regard to point No.1. The second is for consideration on the administrative side. As for the third, any diversion for this purpose has ~~a~~ the direct effect of reducing the amount available for other Capital ~~Xxxkxx~~ purposes. If points 1 and 2 are in in favour of the proposal, the amount required for the proposed expansion may be sanctioned as it is comparatively a small amount, and as the investment is confidently expented to pay a handsome return.

63 It is not necessary to connect this Capital Demand with the profits of the Concern. The profits form part of the revenues of Government and, even if any allotment is made out of revenue i.e., out of the revenue surplus, the capital character of the outlay remains unaltered.

NOTE—Contn. sheet.

Final Note by the First Member of Council.

28

Subject:—

Development of the Government Soap Factory.

71

These papers relate to the expansion of the Government Soap Factory by the duplication of the plant for the manufacture of washing and toilet soaps.

(2) I beg to invite a kind reference to my final note, dated 24th January 1923, stating that the question of the development of the Factory on the lines then recommended by the Director would be further examined and dealt with in due course.

Flag M. (Paras 3)

(3) The Director of Industries and Commerce has now submitted his recommendation to incur a further expenditure of Rs.25,000/- for duplicating the plant and doubling the present output of soaps. He assures that by the investment of this additional sum of Rs.25,000/- a return of Rs.24,072/- per annum may be expected, notwithstanding the fact that the Glycerine Extraction Plant worth Rs.30,000/- will be lying inoperative. This means a return of 26.7% on the Capital outlay already incurred and now proposed. The details of the manufacturing operations and the cost involved etc., will be found in the report of the Industrial Chemist in charge of the Soap Factory. Before the Director sent up his recommendation the position was discussed by me with him in detail, the Industrial Chemist being also present.

P.W.D.

Enclosure P.W.D.

(4) The Soap Factory has so far been the only concern managed by the Industries and Commerce Department that has yielded continuous profits and its past working and the demand for the soaps and their reputation in the market amply justify the expansion of the Factory on the modest scale now proposed by the Industrial Chemist and recommended by the Director of Industries and Commerce.

Yes

29

(5) The additional cost can be found from the accumulated profits earned by the Factory.

Flag M. (Profits) (6) The Financial Secretary is agreeable to the additional expenditure being incurred. The papers were circulated to the Council who are of opinion that the Director's proposals may be sanctioned.

(7) I, therefore, solicit His Highness' gracious sanction to the scheme of expansion. Every endeavour will be made to purchase the additional equipment required in the most economical manner possible.

TELEGRAPHIC ADDRESS "INDUSTRIES"

In reply please refer to
No. 1926

ENCL. No. four

OFFICE OF THE
DIRECTOR OF INDUSTRIES AND COMMERCE, IN MYSORE.

Bangalore, 3rd March 1923.

FROM

P. G. D'SOUZA, ESQ., B.A., B.L.,
Director of Industries and Commerce in Mysore
Bangalore (India)

Stc 29-22-15

To

The Secretary to the Government of Mysore,
General Department,
B a n g a l o r e.

SIR,

Adverting to your letter No. IC. 5189/I & C 29-22-14 dated the 20th February 1923, calling for proposals for the development of the Government Soap Factory, I have the honor to invite reference to my letter No. CC. 11 of the 21st November 1921 to which I have attached a complete estimate forwarded by the Industrial Chemist for expanding the factory so as to manufacture 20 Tons of Washing Soap and 10 Tons of Toilet soap per week. This estimate provides Rs 66,000/- for an extra Glycerine Plant and Glycerine Refining plant, Rs 15,000/- for additional equipment required for the Anderson Oil Expeller and Rs 1,25,000/- for site and acquisition of buildings i.e about - - - Rs 2,00,000/- extra. If we do not put up the Glycerine Refining plant and develop the factory where it is without shifting it, these items may be reduced by Rs 1,50,000/-. Conditions have not changed very materially since these estimates were prepared except that the cost of machinery has gone down slightly and if Government are prepared to provide in all a sum of Rs 2½ Lakhs, it will be possible to put up a plant of this capacity within this amount. The difficulty in regard to available space may be overcome by constructing the factory in 2 or 3 floors and distributing it over the existing space without overcrowding.

In view of the expressed policy of the Government to transfer the factory to private enterprise as soon as possible, I had asked

asked the Industrial Chemist to prepare a small scheme costing about Rs 20,000/- by which we may be able to double our present output of Toilet Soaps. This was submitted to Government with my letter No. OC. 419/22-23 dated the 8th August 1922 but Government in their No. IC. 1892 I & C 43-22-2 dated 3rd Septr. 1922 decided that the question might lie over till the results of the attempts to sell the factory are known. As soon as I found out that no tenders were received, I asked the Industrial Chemist to work out the details of the smaller scheme. I am forwarding herewith proposals submitted by him for this scheme. Our present output is about 3 tons per week. By the expansion proposed by the Industrial Chemist at a cost of Rs 25,000/- the output will be raised to about 6 Tons per week. This will not be sufficient for the operation of the Glycerine Recovery plant. In order to work the Glycerine Recovery plant the output should not be less than 12 to 15 tons per week and to provide for this additional output further expenditure to the extent of Rs 60,000 will be necessary as per details given in the Industrial Chemist's letter No. 2052 dated the 26th February 1923 (Copy enclosed).

Our labour charges are at present about Rs 350/- per month, other establishment charges are also Rs 350/- per month and a moiety of the pay of the Industrial Chemist i.e., Rs 225/- per month are also charged to the Soap Factory or these charges amount to Rs 925/- per mensem or Rs 11,100/- per annum. By doubling the output the labour charges will be raised by about 1/3 to ½, establishment charges by about 20 per cent while no further charge will be made on account of the pay of the Industrial Chemist or in other words we can double the output by raising the labour and other charges referred to above by about Rs 3,000/- or these charges will amount to Rs 14,000/- for the expanded factory. There will thus be a saving of Rs 8,000/- which may be treated as either extra profit or it may enable us to reduce our prices so as to compete with other manufacturers or use it in making better selling arrangements and thereby improving the results of the factory as a whole. There will be some savings in other items such as cost of power and heating and the additional output

output will not only enable us to make the present rate of profit thereon but earn an extra profit of Rs 5,000/- to Rs 6,000/-. The nett profit during the year 1921-1922 was Rs 30,900/= and for the last half year Rs 6,886/=. and we may reckon upon getting this rate of profit at least on the additional output irrespective of the savings in the cost of manufacturing due to increased output.

In regard to the increase of output so as to be able to recover the glycerine, I am strongly of opinion that as we have already got the Glycerine Recovery plant, we should erect it and expand the factory so as to be able to utilize it. The present market conditions are such that it will be possible to work this part of the plant without loss while the experience gained will be very useful to us in the further development of this industry. I may add here that in order to quadruple the output, ~~the~~ over labour and establishment charges and the cost of supervision will only be double of what is now spent on these items in the existing factory.

I have the honor to recommend therefore that Government may be pleased to sanction the expansion of the factory at once at a cost of Rs 25,000/- so as to double the present output of soap as per Estimate "A" attached herewith and approve of its further expansion at an additional cost of Rs 60,000/- as per estimate "B" so as to instal the Glycerine ~~plant~~ Recovery plant. The amount of Rs 25,000/- may be ~~provided~~ met from the sum of Rs 18,000/- sanctioned for capital expenditure for the Soap Factory in G.O. No. IC. 5399-400/I & C 234-22-2 of the 1st March 1923 and the balance from the accumulated profits of the factory which exclusive of interest amounts to Rs 22,042/-. I may be authorised to proceed at once with the first part of the scheme and submit detailed plans and estimates in regard to the second for which information has been called for.

I have the honor to be,
Sir,
Your most obedient servant,

DIRECTOR.

Letter No.1980 dated the 21st February 1923, from the Industrial Chemist, Soap Factory, Bangalore, to the Director of Industries & Commerce in Mysore, Bangalore.

Reference Your letter No.1116 C. dated 10/12-2-23.
Immediate expansion of the Factory.

I have the honour to request you to obtain sanction of Government for an immediate expansion of the Government Soap Factory on a very modest scale, pending Government orders regarding the bigger scheme.

The present proposal is to double the output of the toilet soap. In order to do this the present toilet soap plant is to be duplicated and an extra soap pan put up. The whole scheme requires about twenty-five thousand rupees and we can meet this expenditure out of the ~~xxxfxx~~ profits earned by the factory. The main items of expenditure will be as follows:-

1. One soap-pan of five tons capacity. This will have to be obtained from England. The soap pan manufactured at the Central Industrial Workshop and now lying in the Soap Factory premises is not suitable and I am submitting you separate proposals to have it scrapped and its value written off. I had condemned it as long ago as 1918. The new pan to be ordered from England will cost about £.125/- F.O.B.Liverpool. A comparative statement of quotations received from England from three different Firms is attached for information.

The soap pan requires a dished bottom, or a bottom sloping from the sides to the centre in the form of a cone. I do not think that facilities exist for doing work of this nature at the Central Industrial Workshop.

2. Roller Mills:- We have one set of triple granite roller mills which cost us about Rs 2250/-. Another one of the same size will cost now £.225/- F.O.B. Liverpool. If a quadruple granite roller mill is ordered it is going to cost £.373/- F.O.B. Liverpool. This piece of machinery cannot be manufactured in India.

3. Plodder:- We have a plodder manufactured at the Central Industrial Workshop now working at the Soap Factory. This plodder, even though it works fairly well during the colder months of the Year, gives us any amount of trouble during summer months. The chief cause of ~~xx~~ trouble is the plodder gets heated up during working and on account of this it is difficult to get a smooth bar of soap from the nozzle of

plodder.

plodder. It is very necessary that a smooth bar should be obtained.

If we can get a raw plodder from England to work with the new roller mills, we can examine the constructional details with care and then prepare our own plodders at the Central Industrial Workshop for our future requirements. The price of the new plodder will be £.145/- F.O.B. Liverpool.

In the Industrial Engineer and the Superintendent can undertake to guarantee to make a plodder that will not give us any trouble I hav not the slightest hesitation to have made on the spot.

4. Soap Frames:- We shall be requiring twelve new frames and twelve trollies and these can be manufactured at the Central Industrial Workshop. This item cost us about Rs 2500/-.

5. Stamping machines, dies etc.:- These can all be manufactured at the Central Industrial Workshop. These will cost us about Rs 1000/-.

6. Freight, Carriage, Insurance, Customs duties etc.:- On things obtained from outside and the erection charges here will come to Rs 2500/-

7. We shall have to construct a new shed to cope with the increased output of the toilet soap. The shed will be about 100 feet by 30 feet paved with slabs. This will cost about Rs 9000/-.

8. Sundries like tanks, piping, shafting, pulleys etc., Lumpsum Rs 1000/-.

Total of all items works up as follows:-

Item No. (1)	£.125	Rs 1875
" (2)	225	3375
" (3)	145	2175
" (4)	-	2500
" (5)	-	1000
" (6)	-	2500
" (7)	-	9000
" (8)	-	1000
T o t a l:		Rs 23,425
Extra provided.		" 1,575
Grand Total.		Rs 25,000/-

I request that early orders may kindly be obtained on the above proposals.

Expansion of the Factory

Further to my letter above quoted, I have the honor to submit herewith (as per your orders) a revised estimate for the expansion of the factory. This estimate provides for the manufacture of Crude Glycerine Acid also prepare our own caustic Soda. The estimates are approximate, but reliable enough to arrive at a decision.

Main items of expenditure

1)	Two soap pans 5 tons each ...	Rs	3,750
2)	24 Frames and 24 Frame Bottoms ...		5,000
3)	Stamping machines dies &c ...		2-000
4)	Tanks, piping, shafting &c ...		2,500
5)	Slabbing & Bar Cutting Machines racks &c.		1,500
6)	Caustic Soda pumps and accessories ...		1,000
7)	New Boiler		4,000
8)	One Quadruple Roller Mill ...		5,625
9)	Plodder		2,175
10)	Carriage, freight, insurance, customs etc		6,000
11)	Erection charges		3,000
12)	Routine laboratory, new sheds & buildings		20,000
13)	Extra provided		3,450
		Rs	60,000

All the existing machinery like the Glycerine Recovery plant causticising plant etc., will be made use of and the above - estimate is exclusive of all such items. The present soap factory premises will be roomy enough for the above expansion.

Bangalore the 5th April 1923.

From

P. G. D'SOUZA, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore
Bangalore (India)

7-Apr 1923

The Secretary to the Government of Mysore,
General Department,
Bangalore.

Sir,

With reference to correspondence ending with your letter No:IC. 5915/I&C.29-12-17 dated the 28th ultimo, I have the honour to enclose herein a copy of letter addressed to me by the Industrial Chemist soliciting Government sanction for the purchase of

1 Five ton soap pan	Rs 1,875/=
one set of granite Roller Mills	
1 Triple Roller	Rs 3,375/=
or 2 Quadruple Roller	Rs 5,595/=
One Plodder	Rs 2,175/=

These three mills, if ordered will be suitable for the duplication of our Toilet Soap Manufactory and will fall in under Estimate 'A' submitted along with my letter No:192 C. of the 3rd ultimo. The value of these will amount to Rs 7425/- or 9645/- and can be met out of this year's allotment of Rs 18,000/= for capital expenditure.

I request early orders of Government in the matter.

I have the honour to be,

Sir,

Your most obedient servant,

DIRECTOR.

BV)

Letter No:2354 dated 29th March 1923, from the Industrial Chemist in charge of the Government Soap Factory, Bangalore, to the Director of Industries and Commerce in Mysore, Bangalore.

= = =

With reference to Government Order No:5399-400/I&C 234-22-2 dated 1st March 1923, I have the honour to request you to kindly obtain the sanction of Government to order the following machinery from England by cable. The approximate cost is mentioned against each item of machinery.

1)One five ton soap pan	Rs 1,875/=
2)One set of granite roller mills	
1)Tripple roller	Rs 3,375/=
or2)Quadruple roller	Rs 5,595/=
3)One Plodder.	Rs 2,175/=

The total cost of the above will come to Rs 7,425/= or Rs 9,645/=depending upon the triple granite roller mill or quadruple granite roller mill. To the above must be added the cost of carriage, insurance, freight and customs etc. This might be roughly put down as equivalent to 30% of the cost of machinery.

I have given you full details with regard to the other items of the machinery that will be required for duplicating the present toilet soap machinery.(Vide my letter No:198(dated 21st February 1923)

If the sanction of Government could be obtained for incurring this expenditure immediately we can obtain the necessary machinery from England before the end of the present official year and we can get the building and other necessary things ready at Bangalore by the time the above machinery arrives from England.

I request the favour of early orders.

FROM

P. G. D'SOUZA, ESQ., B.A., B.L.,

Director of Industries and Commerce in Mysore

Bangalore (India)

16 APR 1923

The Secretary to the Government of Mysore,
General Department,
Bangalore.

SIR,

In continuation of my letter No. 287 A. dated the 7th April 1923 submitting proposals for the expansion of the Government Soap Factory, I have the honour to forward herewith a detailed statement prepared by the Industrial Chemist showing the net profits that would be realised by the expenditure of another Rs. 25,000/= ~~is spent~~ for the expansion of the Soap Factory. When the factory is equipped with new machinery the total cost of the machinery including the Glycerine Recovery Plant which owing to the limited scale of operations cannot be used, will be Rs. 90,000/=. On this a return of Rs. 24,072/= is expected per annum after paying interest and depreciation charges. In estimating the profits allowance has been made for a possible reduction in the price of soaps, the price of washing soaps have been taken to be Rs. 24/= as against Rs. 28/=, the present price Rs. 70/= per case of toilet soaps as against Rs. 80/= per case prevailing at present. I beg that Government may be pleased to sanction the scheme for the expansion of the soap factory immediately

I have the honour to be,
Sir,
Your most obedient servant,

P. G. D'Souza

DIRECTOR.

BV)

Government Soap Factory, Bangalore.

Expansion of the Factory.

Working details for a month.

The present output is about 8 tons of soap per month; both toilet and washing.

The increased output will be 28 tons of soap per month.

Of these we shall take 20 tons as washing soap and 8 tons as toilet soap per month. This apportioning out is to be taken as approximate only. Hence all the subsequent figures are also approximate. The actual rates and figures prevailing on 11-4-1923 are taken in the calculations.

(1) & (2) Washing Soap. 20 Tons; Toilet Soap (Neat Soap) 8 Tons; per month.

		Rs.	As.	Ps.
96.25 Cwts.	Ground nut oil @ Rs.560/- per ton	2,695	0	0
178.25 "	Cocoanut Oil @ Rs.670/- per ton	5,803	14	0
27.5 "	Rosin @ Rs.374/- per ton ..	514	4	0
57.75 "	Caustic Soda @ Rs.650/- per ton	1,876	14	0
74 Bags	Common salt @ Rs.6/8 per bag	481	0	0
38 Cwts	of Tallow @ Rs.840/- per ton .	3,696	0	0
	Total Rs.	15,067	0	0

In the case of toilet soap the yield of dried chips would be = 132 Cwts.

(3) Other Charges.

		7.	30/- Assistant Stores clerk (Boxes, Essential oils Labels etc.,)
Rs. 152-8-0.			Rs.250/-

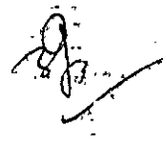
Government Soap Factory, Bangalore.

(1) In the Estimates Rs.500/- has been put down as the expenditure on establishment. The present sanctioned establishment comes to Rs.420/- a month. Two Posts, one on Rs.75/- and the other on Rs.35/- has been vacant on this sanctioned scale, so that the actual pay disbursed for the month of March 1923 was only Rs.310/-. When the Factory expands, the work will be more than doubled, and in order to cope with the extra work new proposals have been submitted. These proposals involve an expenditure of more than Rs.500/- even though a sum of only Rs.500/- has been provided. A certain amount of balancing and adjustment will have to be done so that one or two hands now proposed for regular establishment may have to be kept on the wages system. The Statement will give a fairly good idea of the situation.

(2) On the wages side Rs.700/- have been proposed per month. The actuals for the month of March 1923 came to Rs.387-4-2. In the statement important persons working on the wages system are mentioned. A few additional hands will be necessary and the new proposals in this connection are also furnished in the statement. As mentioned in the note (1) above, a certain amount of balancing and adjustment will have to be made between the establishment sanctioned by the Government and that kept on the wages system. This matter will have to be left to my descretion at the time all the actual employments of these hands.

(3) The total volume of business handled per year (expenditure and receipts both combined) will come to anywhere between 7 and 8 lakhs of rupees. Accurate and clear accounts will have to be maintained and this necessitates a thoroughly organised system of Office and Factory work. Hence the Proposals given in outline in the statement will have to be given effect to when it is decided to expand the

the factory. It is very difficult a[illegible] to give a more accurate idea of the number of hands required.



Issued herewith

Proceedings of the Government of
H. H. the Maharaja of Mysore.

Tanks, piping, shafting, Pulleys &c.	1,000
Provision to meet unforeseen charges.	1,575.
Rs.	25,000

Order No. J.C. 7338-9

Dated, Bangalore the 31/5/ 1923.

The Director states that there is scope for doubling the present output of soaps in the factory and recommends the purchase of certain equipment intended to duplicate the capacity of the present plant. He is of opinion that by the investment of an additional sum of Rs.25,000, a satisfactory return on the capital already invested as well as on the amount now to be spent may be expected.

2. Government are pleased to sanction the recommendations of the Director. A sum of Rs.25,000 will be provided in the budget estimates for 1923-24.

3. The Director is requested to prepare a list of the machinery etc., with complete specifications to be purchased abroad and to forward the same to the special officer on deputation in London (Mr. C. Ranganatha Rao Saheb) for placing orders direct with the manufacturers on the most advantageous

terms. Detailed estimates for expenditure to be incurred locally viz., construction of buildings etc., should be submitted for the sanction of Government.
